

EXP No.: 13

VIEWS

AIM:

To create and manipulate views using MySQL.

PROCEDURE:

1. Select the database containing the movies table.
2. Verify the records in the movies table.
3. Create a view using selected columns from the movies table.
4. Display the records from the created view.
5. Modify the view using CREATE OR REPLACE VIEW.
6. Verify the updated view.
7. Delete the view after completing the operations.

SYNTAX

Query 1

```
CREATE VIEW movie_view AS SELECT M_id,movies_name,Ott FROM movies;
```

Output

```
mysql> CREATE VIEW movie_view AS SELECT M_id,movies_name,Ott FROM movies;  
Query OK, 0 rows affected (0.16 sec)
```

Query 2

```
SELECT * FROM movie_view;
```

Output

```
mysql> SELECT * FROM movie_view;
+-----+-----+-----+
| M_id | movies_name | Ott      |
+-----+-----+-----+
| 101  | Dude        | Netflix  |
| 102  | Premalu     | Hotstar  |
| 103  | OG          | Prime Video |
| 104  | Petta       | SunNxt   |
| 105  | Coolie      | Netflix  |
| 106  | Leo         | Netflix  |
| 107  | Jailer      | SunNxt   |
| 108  | Master      | Hotstar  |
| 109  | Vikram      | Prime Video |
| 110  | Kaithi      | Hotstar  |
| 111  | Retro       | Netflix  |
| 112  | Retro       | Netflix  |
| 113  | Varisu      | Hotstar  |
| 114  | Leo 2       | Netflix  |
+-----+-----+-----+
14 rows in set (0.02 sec)
```

Query 3

```
DROP VIEW movie_view;
```

Output

```
mysql> DROP VIEW movie_view;
Query OK, 0 rows affected (0.08 sec)
```

RESULT:

Thus, the view was successfully created, displayed, modified and dropped using MySQL.
