

EXP No.:21

MYSQL DATE AND TIME FUNCTIONS

AIM:

To implement Date and Time functions using MySQL.

PROCEDURE:

1. Select the database containing the movies table.
2. Verify the records in the movies table.
3. Use the required MySQL date and time functions.
4. Execute the functions using SELECT statements.
5. Observe the returned date and time values.
6. Verify the output obtained from each function.
7. Compare the results with the current system date and time.
8. Record the outputs in the experiment document.

SYNTAX

Query 1

SELECT CURDATE(), CURTIME();

Output

```
mysql> SELECT CURDATE(), CURTIME();
+-----+-----+
| CURDATE() | CURTIME() |
+-----+-----+
| 2026-09-01 | 20:51:34  |
+-----+-----+
1 row in set (0.01 sec)
```

Query 2

SELECT NOW();

Output

```
mysql> SELECT NOW();
+-----+
| NOW() |
+-----+
| 2026-09-01 20:52:20 |
+-----+
1 row in set (0.00 sec)
```

Query 3

SELECT YEAR(CURDATE()), MONTH(CURDATE()), DAY(CURDATE());

Output

```
mysql> SELECT YEAR(CURDATE()), MONTH(CURDATE()), DAY(CURDATE());
+-----+-----+-----+
| YEAR(CURDATE()) | MONTH(CURDATE()) | DAY(CURDATE()) |
+-----+-----+-----+
| 2026 | 9 | 1 |
+-----+-----+-----+
1 row in set (0.01 sec)
```

Query 4

SELECT DATE_FORMAT(NOW(), '%d-%m-%Y');

Output

```
mysql> SELECT DATE_FORMAT(NOW(), '%d-%m-%Y');
+-----+
| DATE_FORMAT(NOW(), '%d-%m-%Y') |
+-----+
| 01-09-2026 |
+-----+
1 row in set (0.01 sec)
```

Result

Thus, the required MySQL Date and Time functions were successfully executed and the results were verified.
