TRIGGER

AIM:

To implement **Trigger** in MySQL.

PROCEDURE:

Step 1: Select the database containing the movies table.

Step 2: Create a separate table to store movie insertion details.

Step 3: Create an AFTER INSERT trigger on the movies table.

Step 4: Define the trigger to automatically insert the Movie ID into the log table.

Step 5: Insert a new movie into the movies table.

Step 6: Verify that the trigger executes automatically.

Step 7: Display the log table and verify the inserted Movie ID.

SYNTAX

Query 1 – Create Log Table

```
CREATE TABLE movie_log (M_id INT);
```

Output

```
mysql> CREATE TABLE movie_log (M_id INT);  
Query OK, 0 rows affected (0.13 sec)
```

Query 2

```
INSERT INTO movies VALUES (113,'Varisu','Vijay','Rashmika','Vamshi','Thaman','Hotstar');
```

Output

```
mysql> INSERT INTO movies VALUES (113,'Varisu','Vijay','Rashmika','Vamshi','Thaman','Hotstar');  
Query OK, 1 row affected (0.02 sec)
```

Query 3

```
SELECT * FROM movie_log;
```

Output

```
mysql> SELECT * FROM movie_log;
+-----+
| M_id |
+-----+
| 114  |
+-----+
```

RESULT:

Thus, the trigger was successfully created and executed in MySQL, and the trigger automatically recorded the newly inserted movie ID in the movie_log table.
